Dear Parents/Carers

**Re: Student access to Wifi**

Our IT provider is working to resolve an issue that is preventing student devices from logging on to the network in a uniform way. Until this is resolved, students will not be able to use their devices in school.

This is very frustrating for all subject staff as lessons are planned around the use of IT in the classroom. Homework can, and will be set based on apps and will be communicated through Milk as this can still be accessed at home.

We hope to resolve this issue as quickly as possible and will inform you as soon as we have done so.

Yours faithfully

Mr J Fletcher  
Headteacher
